**Live Telephony Statistics
for Informed Decisions**

CommsOffice Professional – Communications management for every business

After salaries, overall communication costs are the largest single office expense. These costs are usually unmanaged, increasing and out of control. CommsOffice Pro, from CommSoft, is a telephony management and reporting solution that gives companies the ability to track and control telephone usage throughout their organisation. Groups or agent activity can be measured with live ACD call statistics, helping you to make accurate decisions about requirements for your business.

CommsOffice Pro is a sound business investment for thousands of UK organisations whatever your industry. If you want to track sales teams, support environments or

contact centre agents, monitor employee's telephony use, control costs or predict peak business times, CommsOffice does all of these things and more.

CommsOffice Pro is ideal for contact centres but any type of business can use CommsOffice Pro, if you have a telephone system in the building, then you should be monitoring usage.

CommsOffice Pro has a familiar MS Outlook feel with its user friendly interface. There is a vast range of standard and easily customisable reports available. CommsOffice is easy to install, use and maintain.

Telephone system management

- How many non-business related calls are being made from your company every day?
- Is your PABX fed with the optimum number of lines?
- Are these lines linked to the most efficient network carrier for your needs?
- How many customers does your company aggravate, or worse lose, through abandoned calls and unacceptable ring times?
- Does your staff use premium services more than necessary?
- Which department or individual incurs the majority of these costs?
- What time of day are your phones most/least busy?
- How much direct feedback is generated by specific marketing campaigns?

CommsOffice Pro can be used in a wide variety of departments within any organisation.

CommsOffice Pro features full call management software, live ACD call statistics and a scrolling 'ticker-tape' agent view for monitoring a group of agents in a call or contact centre.

CommsOffice Pro provides information, to enable managers to obtain a wide range of reports that show telephony usage in their business. The 'Today' screen shows a real-time, at a glance view of telephony usage. Information on live ACD call statistics assists any company that needs to monitor a group of agents in a contact or call centre. The scrolling desktop wallboard feature runs on

In short, any company or organisation with a telephone system can benefit from using communications management software to monitor costs, productivity and efficiency. CommsOffice Pro is the ultimate communications management system, offering maturity, stability, ease of use and powerful market-leading technology to worldwide business.

CommsOffice Pro brings you live call statistics using TAPI information from your telephone system to deliver real time information on groups of agents and their performance. View live calls in progress, agent status, duration of calls, average ring times, agent logged in or out, auto attendant statistics including overflow and much more. The 'ticker tape' view scrolls across the screen no matter what application you are in: choose from a range of statistics and customize the scrolling speed and font to personalise your view. You can display agent statistics on client PCs or on a plasma screen in 'presentation mode' and take off the menu tree to show just wallboard tiles or a list view or a chart view of agent statistics.

See at a glance whether agents are on in bound or out bound calls, in wrap up, logged in or logged out. Wallboard tiles can have 'threshold alarms' for items like abandoned calls or if pre set levels are exceeded. Report on agent performance at group and individual performance levels from the comprehensive selection of ACD reports. CommsOffice Pro comes with unlimited client licences so you can run the application on as many client PCs within your organisation as you like at no extra cost. CommsOffice Pro is easy to scale and grow if your contact centre expands. CommsOffice Pro can be run as a multi site by adding remote site licences to any head office site.

- ACD alarms – visual and audible
- ACD graphs by agent, group or queue
- AD interactive functions (call in progress details)
- ACD live statistics
- Auto Attendant statistics including overflow
- ACD wallboards with choice of statistics to display
- ACD logger runs as a service
- ACD reports available

- ACD Ticker Tape available externally for supervisor monitoring
- ACD Ticker Tape also available internally
- ACD Ticker Tape for multiple agents, groups, queues or combination
- ACD Wallboard view by agent, group and/or queue

Features & Benefits of CommsOffice Pro

- Full call management reporting with wide range of reports
- Integrated live ACD Stats
- Ticker-tape scrolling or tile view of live ACD stats
- Ideal for contact centres & any business with a phone system
- Microsoft Outlook appearance – familiar and easy to use
- Integration of voice recording files with call management reporting
- Multi-site capability
- Built-in alarms and fraud prevention to highlight telephone system abuse
- Includes custom build database utilities
- UK based support, design & integration
- Simple on-line software registration
- Easy to install and maintain with reliable stability

Minimum System Requirements

- Windows 2000
- Pentium III
- 2GB free on hard drive
- 256 MB RAM
- Floppy and CD ROM
- RS232 serial cable connected between your PBX and the computer that will be logging calls (if the PBX is not IP addressable)
- Internet connection for product updates and maintenance
- Computers will require NIC (Network Interface Cards) if the products are to be used over a network

CommsOffice v7.000 Features	CommsOffice	Professional	Enterprise	Voice
Network/Connectivity:				
Call logging runs as a service	●	●	●	●
Data captured via RS232, IP or Database connection	●	●	●	●
MS SQL Database	●	●	●	●
Multi Site configuration	●	●	●	●
Multi user with security by user or group level	●	●	●	●
Multiple organizations and departments within one site installation	●	●	●	●
Real time call capturing and reporting	●	●	●	●
Split database across multiple machines (large installations)	●	●	●	●
